

Serial No. 10/722,672

**Amendments to the Specification:**

Please replace paragraph on page 5, beginning with line 16 with the following amended paragraph:

Yet another aspect of the ~~improved~~ invention is to provide a first protective sheet facing the diodes to pass light emitted by the diode array; and to provide a second sheet at the opposite side of the screen and diodes, the first and second sheets forming an enclosure within which coolant fluid is flowable. The screen itself may be dark or darkened to increase viewing contrast with the LED array, during its operation.

Please replace paragraph on page 19, beginning with line 15 with the following amended paragraph:

Fig. 17 shows positioning balls 110 between the tops of conductors 12 woven above and below conductors 11. Balls 110 also serve as protection and spacing means. LEDs are mounted on conductors 11 between conductors 12. A superstrate 111 may be located at the tops of the balls 110. Superstrate ~~111~~ 111c may be a transparent plate, to pass light emitted by the LEDs. A second plate may be provided at the opposite side of the screen, as at 111d, to pass diode array light, as referred to above. Coolant fluid may be flowable between 111c and 111d.
